RE-OPEN PROBE INTO FATALITY

Red Deer, Oct. 17—Inquest was scheduled to open this afternoon into the fatal shooting a year ago of Olaf Kolstad, Airdrie hotel-keeper.

Kolstad was mistaken for a deer while big game hunting 30 miles north-west of Rocky Mountain House Friday, December 1, 1933. He was accompanied by George Huser of Crossfield, and Ben Olsen, Rocky Mountain House guide.

At the time coroner and police investigated the case, and decided an inquest was unnecessary. Further investigation is now deemed necessary.

NIGHT WATCHMAN ON THE ALERT

Since the appointment of Russ Nichol to the position of night watchman or policeman no "break-ins" as have been experienced in the past have been recorded and it would seem that his appointment has been a timely one.

On the job all the time that's Russ' motto and when it is known around that we have a man on the job, law breakers will give this town a wide berth.

PASSES ANOTHER MILESTONE

Today our good citizen Robert Gibson celebrates another birthday, having seen exactly 79 in all. The Chronicle joins with his many friends in wishing him "many happy returns of the day" and may he continue in health and strength and see many more birthdays.

JUVENILE SMOKING

A recent edict was issued by the City of Nanking authorities that drastic punishment would be meted out to any minors found cigarette smoking, and police were instructed to arrest any culprits found in the act.

It has come to our attention that quite a habit is forming among some of our older school boys, not only do they like to indulge in "fag" smoking but they also like to encourage lads younger than themselves in this practice.

It would seem therefore expedient for all parents to make a close check up on their boys and thereby assist the school authorities to stamp out this injurious habit amongst our young children.

IS THE TRAVELLING PUBLIC ACCOMMODATED?

It would appear that the travelling public as far as waiting room accommodation is concerned are being penalized.

After the hour of 6 p. m. the waiting room is closed and intending travellers denied a place of comfort to await departing trains.

The remedy apparently lies with the C. P. R. officials and not with the local agent.

Whist Drive October 22nd.

The Floral Local U.F.W.A. will hold a Whist Drive in the U.F.A. Hall on Monday, October 22nd, at 8.30. Admission 25c. Good prizes, and a good lunch. All welcome.

Masons Visit Calgary Lodge

A delegation from Crossfield paid a fraternal visit, by invitation, to Ashlar Lodge A. F. & A. M. Calgary at the week-end. The following members made the trip: Ivor Lewis, R. M. McCool, Dr. S. H. McClelland, C. H. McMullan, Rev. A. D. Currie, F. A. Purvis.

The guest speaker at Calgary was Dr. Buswell who showed an interesting group of scenic motion pictures taken during his two year's stay in England, Scotland and other countries in Europe.

Bud Fraser had the misfortune to cut his knee at the joint on Sunday while cutting wood and is at present a patient in the Holy Cross Hospital, Calgary.

Harry May had a ten acre field of Garnet wheat that made 47 bushels to the acre.

Enumerators Register Voters

The compiling of a voters' list for each polling division has been ordered by proclamation of the Dominion Franchise Commissioner and the following enumerators have been appointed in the Crossfield district:

Polling Division 70—W. C. Cochrane, Polling Division 51—H. May, Polling Division 57—M. Thomas, Polling Division 59—Mrs. R. Arnett, Polling Division 56—F. Stevens.

Under the new Franchise Act enumerators become permanent officials and will revise the electoral lists for their respective polls each year. The list is to be prepared from the 15th of October to the 17th of November this year, when they are finally closed will be a basic list for each polling subdivision. If your name is not on it you will not be entitled to vote. The day of swearing in on election day is past.

The new regulations make cleaner lists and give everybody the opportunity of knowing whether he can vote or not. It places the responsibility, once the basic list is completed, directly upon the elector himself. The enumeration will be as extensive as possible. The preliminary lists will be posted in conspicuous places so that electors will be able to find out if their names are on and if not, the enumerator, who is also the revising officer for his poll will place them on if the applicant proves qualified to vote.

Crossfield Dramatic Society

The above society will present its first show on Tuesday, October 30 at 8.15 p. m. in the U. F. A. Hall. Tickets are for sale at the Banister Electric, and the price is fifty cents. Tickets may be reserved at no extra cost, and we hope that prospective patrons will secure their tickets early, in order to avoid being disappointed later.

We wish to tell you about the "Neighbors" a comedy by Zora Gale, which is one of our presentations.

This play concerns an episode in the lives of plain folks, and when read over it appealed to us in the way that a good yarn would. Most of us have lived in communities where "esprit de corps" was rendered impossible by the insidious activities of sundry scandal-mongering individuals, whose belief it is that the only way to subdue the rattling of some mouldy skeleton in their own cupboard, is to make vile insinuations regarding the actions of their betters. We therefore found it refreshing to note that the folks in "The Neighbors" believed with the poet that "the quality of mercy is not strained," thus when one of their number was in need of their assistance, they rallied nobly to her support. What is sadder to the heart of the idealist than the prospect of a world where Christianity is given an opportunity to prove its worth, and where Christian charity is extended to all and sundry. Illustrating as it does, the practicability of the Golden Rule, we are sure that this play will appeal to everyone.

The cast is as follows: Esther Devins, Mabel Young, Rev. A. D. Currie, Glen Williams, Alice Collicutt, Stella Gordon, Jean Stevens and Annie McClelland. The play is being directed by G. V. McLean.

Hallowe'en Tea October 26th.

The Mission Band will serve a Hallowe'en Tea at the home of Mrs. P. Fleming on Friday afternoon Oct. 26th from 3.30 to 6 o'clock. Adults 20c, children 10c.

Rev. Beaton at United Church

Wednesday, October 24th.

A special meeting will be held in the Crossfield United Church, Wednesday evening October 24th at 8 o'clock, when Rev. Kenneth J. Beaton, B.A., returned Missionary from China, will give a missionary address.

COMING EVENTS

WHERE TO GO

Monday, October 22—U. F. W. A. Whist Drive in the U.F.A. Hall, Crossfield. Wednesday, October 24—Rev. K. J. Beaton, returned Missionary from China will give an address at United Church Friday, Oct. 26—East Community Hall Dance.

Saturday, October 27—Grand Hallowe'en Dance in the U.F.A. Hall. Music by the Borbridge Orchestra.

Sunday, Oct. 28—Anniversary Services Crossfield United Church.

Monday, Oct. 29—United Church Social.

Tuesday, October 30—Crossfield Dramatic Society presents three one-act plays: "The Valiant," "The Neighbors," "A Serpent's Tooth" in the U.F.A. Hall at 8.15 p.m.

Friday, Nov. 9—Crossfield Legion Armistice Dance.

Saturday, December 1st.—Junior W. A. Bazaar and Tea.

BORN—To Mr. and Mrs. John Heiser on Oct. 17, 1934, twin boys.

Lessons Of The Depression

Perhaps the wish is father to the thought but it is quite evident that, in steadily increasing degree, people are expressing the view that the depression which has hung over the world like a fog for the past five years is lifting, slowly perhaps but nevertheless surely, and that gleams of sunlight are seeping through for the encouragement of mankind and the restoration of confidence.

In support of this view statistics are quoted of increased business, rising prices, more employment, increased revenues for the railways, rising national revenues. Betterments of this kind are noted, not in one but in many countries, and from many quarters come reports that there is a growing tendency on the part of people with money to invest to again proceed to do so.

Whether this more optimistic viewpoint is justified we are not in a position to say, and it is just possible that the statistical betterment noted is the result of the injection of artificial stimulants into the arteries of business by governmental bodies, rather than the outcome of a natural and more substantial improvement in conditions. Whatever may be the underlying cause of this slowly returning confidence, it is undeniable that it exists, and people believe that the tide waters which have been running so strongly in an adverse direction for so long have passed the peak and are now beginning to flow in an opposite and more favorable direction.

Coupled with this, there is recognition in Western Canada that, while such betterments may be seen in other parts of the country and the world, there can be no marked improvement throughout this section of the Dominion until it is blessed with more favorable and normal climatic conditions, resulting in some profitable return to our agricultural population for the continuous labor they have expended. Unemployment has not been the curse of the vast majority of Western people. They have worked long and arduous hours, 365 days in the year, but Nature in an unkind mood for some years past has denied to our working farmers any profitable return from their labor; in fact, in thousands of cases no return at all. Loss has been added to loss, and the cumulative effect has been to throw tens of thousands of other people out of employment because there was no work to be had. Such climatic conditions will not permanently continue.

Possibly one of the best indications that the depression is passing is that people are beginning to take note of the lessons which it has taught. Some of these are of a purely material and practical kind. For instance, and despite a certain school of thought which urges that man should plan his activities from year to year, and, as nearly as possible, balance production with consumption, there is a growing recognition of the wisdom displayed in Egypt in the days of the Pharaohs when under the guidance of Joseph they laid by and accumulated reserves in the years of plenty to carry them through the lean years. It is more and more coming to be accepted as a truism that in Western Canada we must do likewise.

But above and beyond the material lessons taught by the depression—lessons, it is to be hoped, that have been well learned by many—there are moral, ethical, spiritual lessons, the importance and significance of which will, it is also to be hoped, leave no lasting impression.

Ritchie, the famous prize-fighter, is reported to have once said that he never knew how good he was until he got his first licking. Many of us have taken a pretty severe licking in different ways during the past five years. It sometimes does a man good to be thoroughly flogged. It may call up reserves of energy that he never realized were his. And this seems to be, ought to be, to the credit side of the depression. Adversity brings out the strength of character of men and women, or the lack of it. Seemingly strong men have gone down and gone under; others have displayed an initiative and developed traits of character and strength which even they did not know they possessed.

Assuming that the fog of the depression is lifting, and that we are again slowly emerging into the sunlight of more normal times, now is a good time to take stock of what the depression has actually done to us as individuals and as a nation. If we correctly size ourselves up as individuals, and profit by our inventory of ourselves, the nation will be better, stronger, more enduring. This, then, is a time for realistic balance sheets—balance sheets of character, of habits, of motives, as well as, and even more important, in the final analysis than balance sheets of money, stocks, bonds and chattels.

"I have just taken a real inventory," said a man who has had his full share of bad business breaks. "I've thrown out a lot of stuff I used to carry as assets. For instance, I carried on my payroll a lot of useless luxuries that were called 'friends.' When I couldn't manage the upkeep any longer, I let them go. Then I found out that they had been standing in front of people that really were friends. I'd been spending time and money on people that didn't mean a thing to me, and neglecting those who did. Now I see a few special people often, and have a better time with them. I think, on the whole, I've come through the depression pretty well. The cash value of my estate has shrunk considerably, but that's balanced by a big increase in value measured by any yardstick of dollars and cents. The result is, my net worth is greater. There's a good side to going broke."

How many people have been wasting time, money and energy upon things that really do not count, and neglecting those that are worthwhile and make life what it ought to be and was intended by an all-wise Creator to be. Has the depression taught you who reads this any lessons? Are you a better man or woman because of the depression, or have you revealed weaknesses of character and slipped? Are you now showing determination to profit by the lessons learned. If so, with all its worries and difficulties and even sufferings, the depression may be turned to good account. It's up to you.

The number of live cattle shipped in 1934 to the United Kingdom up to September 13 was 37,775 head compared with 36,229 head during the corresponding period of 1933.

The Polish government uses 60,000 tons of herring annually.

All antiquated vessels in Italy are being scrapped.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pain, checks the looseness of the bowels, and thus does away with the suffering and often times the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bracing up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 88 years—you do not experiment when you use.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Old Ship Scuttled

Otago Was Once Commanded By Conrad The Novelist

Sixty-three years ago a small sailing ship of 348 tons, the Otago, left Liverpool for Port Chalmers, New Zealand. She did the voyage in the almost record time of 85 days, and many were the yarns told of her, both in the town and at her destination.

Now she has been taken out to sea for the last time and scuttled. It just did not pay to break her up. But her past was a tale of romance. She was once the command of Joseph Conrad, novelist, and later he made references to her in his books—"The Mirror of the Sea," "Falk," and "The Shadow Line."

Built in 1869, she put up some fine performances. Once she sailed 306 miles in 24 hours. Her last 40 days were spent as a coal bulk in Hobart, Tasmania, a battered but proud vessel.

THIS IS THE WAY TO HAPPINESS

There's nothing—absolutely nothing—to take the place of perfect health as the foundation of a happy life. And no better way for every one to get it than to turn to that famous tonic, **Wincinac**. Wincinac is not a drug. It is simply the purest of pure wine with all the valuable properties of the 2 1/2 lbs. of grapes which go to every bottle, combined with the strengthening elements of beef and guaranteed vitamin milk extracts.

From your first glass of Wincinac you will feel new vigor stealing through your veins. You will sleep more soundly, wake up refreshed in a few days you will have forgotten the irksomeness of a life of ill-health. You will go through the most strenuous day at the top of your power.

Twenty thousand doctors have recommended Wincinac for nervous disorder, anemia, debility, and all run-down conditions. Start taking—and enjoying—Wincinac today. Your Druggist sells Wincinac—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto.

Travelled In Baggage Car

Argentina's Fat Man Could Not Get Into Coach

Argentina claims the world's fattest man. He is Pedro Cardozo, a butcher, weighing 632 pounds. He arrived at Buenos Aires from Rosario after travelling in a baggage car because he could not enter the coaches. He is 30 years old, 5 feet, 6 inches tall, with a waistline of 7 feet 10 inches, a forearm of 1 foot 10 inches, and a thigh of 3 feet 9 inches. When he was 19 he weighed only 158 pounds, but he had to quit working at 25 because he had reached his present weight and could not stand on his feet more than a few minutes at a time.

IT'S LIVER THAT MAKES YOU FEEL SO WRETHED

Wake up your Liver Bile

—No Calomel necessary

For you to feel healthy and happy, your liver must be in good condition. Your liver is the great filter of your body. Without it, bile, the waste of your body, would be poured into your blood. It is the liver that makes you feel so wretched. It is the liver that makes you feel so tired. It is the liver that makes you feel so sick. It is the liver that makes you feel so weak. It is the liver that makes you feel so old. It is the liver that makes you feel so miserable. It is the liver that makes you feel so wretched.

Glaciers Move Backwards

Unusual Happening In Switzerland

Explained By Scientists
No fewer than 61 of 100 glaciers in Switzerland which have been under observation by the Society of Natural Sciences are reported to be moving backwards. Of the remainder, 15 are moving forward and four are standing still. The scientists say that the 81 glaciers are moving backwards because they are melting more quickly at their "ends" than they are being pushed forward.

Abner Doubleday, of Troy, N.Y., founded the American national game, baseball.

Kidney Troubles

cause poisons to accumulate in the system and bring on persistent backache, lumbago, rheumatism, or sciatica. Take Gil Pills to restore the kidneys to a healthy condition and eliminate the poison from your system.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

CAN'T SLIP OR SLIDE FALSE TEETH

Don't use any old kind of remedy to keep false teeth in place—use a reliable, recognized one which dentists prescribe such as Dr. Wm. S. Fowler's—

largest seller in the world—grips teeth so secure you could tumble they feel natural. Fastens so securely that you can talk, laugh, eat, and sleep with perfect comfort assured all day long. Forms a special comfort cushion to protect and soothe gums. No colored, gummy paste—keeps mouth sanitary—breath pleasant. Inexpensive—all druggists.

Siren Warns About Tides

Quickens in France Traps For Feet Of Unwary

Mont Saint-Michel, most photographed French landmark, is to be provided with sirens against the peril of the sea.

Debate on the advisability of protecting strollers along the quicksand beach, incidentally, has led to the discovery that there is no such thing as being swallowed up by these oceanic bogies.

Many an ancient Breton mariner, it has revealed, has been caught in quicksand and survived. The question is one of time. Rarely is a man sucked down to above the waistline, because the subsoil is firm at that level, but many have been caught at a time when the tide was coming in and drowned.

The danger is that of drowning when the tide comes up from seemingly nowhere filling the vast reaches of sand with furious torrents and treacherous eddies.

Victims more often than not are visitors who start out for the historic island of Tombelaine, and fooled by their calculations of distance and time into being trapped by the tide.

Some, of course, are caught in quicksand and are unable to free themselves before the tide gets up to their chests. Seized with panic even if caught only up to their knees, they struggle frantically, and although it is not true that they sink into the sand, it is true that their methodical struggles prevent them from getting free.

siren on the hill, it is argued, would warn these travellers to turn back in time. It also is proposed to erect concrete "islands" at various points for the protection of promenaders caught by the tide.

Walking For a Wager

Saskatchewan Youth Has Already Covered Two Thousand Miles

With about 2,000 miles behind him and about four times that far to go before he can collect a wager of Waldeck, Sask., Ernest, son of Waldeck, sauntered into Montreal, October 1.

Wall made a bet with his mayor that he could start with 10 cents in his pocket and walk 10,000 miles in one year. He set out from his home town July 8 and has walked ever since, travelling to Montreal across the prairies and the desolate north shore of Lake Superior. From Montreal he heads towards the maritime provinces.

To collect his winnings, the 21-year-old Saskatchewan youth must not travel on the same road twice. Nor must he snatch rides on freight trains. He must get the signature of the mayor of every city and town he visits and must obtain one signature for every mile he walks. He is not permitted to ask for aid or remuneration for services rendered, but can accept anything given voluntarily.

Submarines Made Safer

All the new submarines built for the British navy have two safety devices, one consisting of eye-bolts to which divers may attach a hawser in case of need, and the other being a battery of buoys which can be released from within the vessel to permit communication with rescuers.

Perfects New Device

Working on the theory that every metal has a radio wave length, Harry L. Berry, 34-year-old inventor of Tucuari, N.M., has perfected a device to locate buried treasures. It is built around a single radio tube, and is a compact unit weighing ten pounds.

California has more than 17,000 trees with trunks at least 10 feet in diameter.

Benzene, or benzol, is one of the most important of the compounds of carbon.

The oldest and most picturesque windmills are to be found in Greece.

The average age of horses in the United States now is 12 years.

W. H. U. 2066

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT (Grapho-Analyst)

(All Rights Reserved)

(Editor's Note: These articles on Character from Handwriting have aroused enormous interest. Many readers are sending in specimens of their own handwriting for a personal analysis. If you want your handwriting analysed, see the announcement at the foot of this article.)

A Grapho-Analyst's mailbag is very interesting. It is a reflection of people's hopes and fears, worries and problems—it is a very mirror of life itself. And for each question, the Grapho-Analyst can supply an answer.

Hand writing shows so plainly the character of the writer. Grapho-analysis is an X-ray that cuts through the verbiage, and gets right down to the very nature of the writer.

A girl writes in tormented fashion, pleading for help as to how to deal with her brother and father. They are making life miserable for herself and mother and threaten to do bodily harm if the latter do not do what they are told in regard to some money that the men want. The writing of the father and brother show greed and selfishness, with a brutal violence sometimes rushes over into violence.

Another girl is having trouble with her boy friend. Is he to be trusted? There are many letters of this kind. And very often, we can give a reassuring answer. Sometimes our advice will hurt—but the truth is what people are asking for.

A young man sometimes to know the characteristics of her young daughters. And what talents they possess. His writing reveals the character of the father and brother show greed and selfishness, with a brutal violence sometimes rushes over into violence.

Another mother is perplexed about her boy. He is the only child she has and she does not understand him. Grapho-Analyst reveals his hidden traits, and suggests a line for the mother to work along.

A young man from the West says his life has been miserable, and, try as he will, he cannot do anything right. His writing reveals the tremendous colour in his nature, and the need for great control. He has a hard row to hoe before he can regain normalcy.

The letters show how many people are squaring pegs in round holes. Real talents waste because the possessor is in a vocation totally unaffiliated to him.

Opportunities lost, because people have not developed the essential qualities of will and determination. Grapho-analysis is very helpful. It reveals not only the major characteristics, but also those hidden tendencies that are gradually looming up, and will, ere long, affect one's mode of life. If they are strong points, they can be developed. Often, they are potential weaknesses, and need tending. Grapho-analysis shows the way.

What does your handwriting show? Let a skilled Grapho-Analyst tell you the secrets that your writing reveals. You will be surprised at the revelations. You will see the true character of your friends. Send specimens of the writing you want analysed, and enclose 10c coin for each.

Enclose with 3c stamped address envelope, to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg, Man. Letters are confidential and will be answered as soon as possible, but please allow at least two weeks for your reply.

Butter, cheese, bran and pollard, oilmeal and oilcake, oats, wheat and rye, hard, hard, and hard, salted beef and pork, condensed milk, refined sugar, unmanufactured, untempered leaf tobacco, potatoes, onions and lubricating oil are some of the agricultural products supplied by Canada to Barbados, the most easterly island of the British West Indies.

An Ohio bread company is putting out dated bread.

Faster Way Now to Relieve Neuralgia

DISCOVERY ALSO EASES BAD HEADACHES MUSCULAR PAIN OFTEN IN FEW MINUTES

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get **ASPIRIN**, the method doctors prescribe. It is made in tablet form, and it dissolves in water. It is the same Bayer form of a cross on every Aspirin tablet. Get up to 12 tablets from an economical bottle of 24 or 100 tablets.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get **ASPIRIN**, the method doctors prescribe. It is made in tablet form, and it dissolves in water. It is the same Bayer form of a cross on every Aspirin tablet. Get up to 12 tablets from an economical bottle of 24 or 100 tablets.

Why Aspirin Works So Fast

Drop an Aspirin tablet in a glass of water. Note that it dissolves. It is the same Bayer form of a cross on every Aspirin tablet. Get up to 12 tablets from an economical bottle of 24 or 100 tablets.

What happens in these glass tablets start "taking hold" of pain a few minutes after taking.

When in Pain Remember These Pictures

—ASPIRIN DOES NOT HARM THE STOMACH—

Safety Of Children

Cold weather source of discomfort and danger

Children's skins are very tender. Fall and winter wind and dampness quickly make them tender, raw and sore. They need the protection of Hinds Honey and Cream. Children's Cream. Children's lotion gives protection and relief to little hands, necks and faces.

When the skin is so tender, it is the danger which lurks when sore skin becomes cracked and bleeding from constant exposure. It is a constant protection against little hands can easily become infected. Apply Hinds Honey and Almond Cream generously to tender skin—its smooth, cool texture will soothe hands and faces after washing, and form an acquire protection against wind and dampness. An instant relief for chapped hands—a constant protection against them—Hinds Honey and Almond Cream has been the reliable remedy for old and young since 1873.

On sale at all drug stores.

World Peace

League Of Nations Society In Canada Organizing Mass Meeting

Canadians are vitally interested in world peace. Primarily this is true because of the humanitarian outlook of our people and because of the stress we rightly place upon law and order in all realms, not excluding that of international affairs. This general interest is strengthened for us by two special considerations. Firstly, our position as a member of the British Commonwealth would make it exceedingly difficult for us to avoid becoming involved in any large-scale conflict. Secondly, our trade position as a great exporting country makes it exceedingly important for us that confidence, peace and financial stability be restored throughout the world.

The League of Nations Society in Canada is organizing a series of mass meetings throughout Canada late in October, 1934, with a view to bringing these and other important considerations before our people and developing a sound public opinion in support of the maintenance of peace. The time signatures being held by the Saskatchewan members of the National Council of the Society, urge all communities in Saskatchewan to join with the rest of Canada in this demonstration by organizing local meetings and addresses at the time. Programs and necessary information and assistance can be obtained from the Society's office, 124 Wellington Street, Ottawa, on request.

Peace is not a militaristic nation, but the best safeguard against its becoming so, and the best assurance of our influence remaining a steady one at Geneva and elsewhere abroad is the development of a strong public opinion in this own country. We therefore confidently and earnestly commend this program to our fellow citizens of Saskatchewan. L. C. Brouillette, Secretary; Andrew S. Sibbald, Saskatchewan; (Mrs.) Violet McNaughton, Saskatoon.

The purpose of the Canadian Farm Loan Act Amendment Act passed during the 1934 session of parliament is to extend the scope of the Loan Act so that increased credit facilities through the Canadian Farm Loan Board may be placed at the disposal of the farmer in order to enable him to carry on his business.

The shipments of livestock from Western to Eastern Canada for the first 36 weeks of 1934, ending September 7, included 62,560 cattle; 701 calves; 150,442 hogs; and 45,222 sheep.

Converted into a trench during the World War the Ypres-Comines Canal in Belgium is to be used as a canal again.

Radium Storage System May Result In Increased Use And Widen Scope Of Radio Activity

A storage system for radium rays whereby the precious metal can be kept at work 24 hours of the day, whether there are patients to be treated or not, was described at the International Conference of Physics by Professor J. C. McLennan, of the University of Toronto, who has been working in England.

The storage plan grows out of discoveries first announced by the late Curries, Dr. Pierre and his wife Marie, among the first to investigate radio-active elements.

They found that common elements—at least 60 of them—when bombarded by high energy rays became temporarily radio-active and gave off the same rays as radium for periods varying from a few seconds to a few minutes.

Prof. McLennan applied this principle, using five grams of radium under his charge. Normally, when not in use it was enclosed in a lead case to prevent the dangerous rays from getting about and causing injury, but the disintegration which causes the radiation would continue at the normal rate.

The disintegration has not been anything to worry about heretofore. First, because it would last thousands of years and second because nothing could be done about it.

Now Professor McLennan has imprisoned various metals in the lead box along with the radium. These include aluminium, boron and beryllium.

They pick up the radio-activity from the radium, he reports. Evidently the same thing happens to them as to the metals and other substances which the Curries have been bombarding with various kinds of high-powered rays.

What actually seems to happen is that a little of the bombarded substance changes into something chemically and automatically different than its parent. This bit of different or new matter does not last long. It blows up just like radium, only much more quickly.

This happens also to the metals which Professor McLennan imprisons under the full force of the radium rays.

After being removed from the radium chamber these substances give off rays of their own. Whether the rays have the same effect on living tissues as radium is now under investigation. Prof. McLennan is using plants and small animals to test their effects.

If these stored rays are like radium it appears possible that the medical men will have a whole Pandora's box of rays at their command and under such good control that they can have a two-minute ray or a five-minute one—or even a very hard ray or a soft-boiled one, according to the diagnosis of the patient's needs.

John Cunningham McLennan, O.B.E., is professor of physics and director of the physical laboratory at the University of Toronto, and Cambridge. He was appointed scientific adviser to the British admiralty in 1919 and in 1928 was royal medalist and Bakerian lecturer of the Royal Society of London. He is a past president of the Royal Society of Canada and the Royal Canadian Institute.

He was born at Ingersoll, Ont., in 1867 and finished his education at the Universities of Toronto and Cambridge. He was appointed scientific adviser to the British admiralty in 1919 and in 1928 was royal medalist and Bakerian lecturer of the Royal Society of London. He is a past president of the Royal Society of Canada and the Royal Canadian Institute.

Early History Of The West

H.B. Company Traders Here Long Before Explorers

Long before official explorers came with drums and trumpets to "discover" the west, Hudson's Bay Company traders had crossed the plains and reached the Rocky Mountains. This was one of the interesting discoveries by Prof. A. B. Morton of the University of Toronto, who has spent last year delving into the Hudson's Bay Company's records, which are stored in the London head office vaults.

The inside story of the Selkirk settlement on the Red River will need re-writing in several respects and the reason for fundamental change in the company's policy is made clear as a result of Prof. Morton's study of the journals and letters carefully filed more than a century ago.

The oldest national flag in the world is that of Denmark, which has been used since 1519.

Baby trout, like human infants, thrive on milk and orange juice.

A New Cattle Food

If Process Successful May Be Valuable During Drought

Can you imagine cattle eating food that resembles plug tobacco?

Such a novelty may be possible in the next few years if a new process developed by a United States chemical engineer is utilized.

This expert, Guy Leonard by name, has created a food out of molasses and cotton-seed meal in which he uses a new scientific principle for mixing molasses, which has been for many years a cattle fattening food, but difficult to handle because of its stickiness.

Leonard has taken all of the stickiness out of the molasses by masking it with cottonseed or corn oil. In addition to the plug type of food he has also developed another one like Boston brown bread.

The announcement of those two foods calls attention to the ceaseless quest of science for new aids for animals as well as humans. In this instance the long drought in the United States probably prompted the engineer to launch his experiments as it is stated the new foods will be valuable for stock feeding during drought.

The old axiom "necessity is the mother of invention," seems to be well exemplified in this new development.

By Ruth Rogers

"I haven't had a bite for days," said a tramp to the landlady of the George and Dragon. "Dyer think you could spare me one?"

Had Met The Dragon

"Thank yer," said the tramp, and launched off, but a few minutes later he was back.

"What d'yer want now?" asked the landlady.

"Could I have a few words with George?" queried the tramp.

Casein, an important white protein substance in milk, is found in no other material in nature.

There's one thing we like about Mickey Mouse—he's never said he would rather play Hamlet.

THE SNAPSHOT GUILD

USE THE FINDER

At what is the girl pointing? Why? What of it? A good picture, but uninteresting because it tells no story and fails to explain itself. There is no question, however, about the snapshot of the hunter. It tells a complete story, its composition is successful.

Listen to an any snapshotting beginner as he goes over a fresh batch of prints:

"Boy, look at that! Got that string of trout swell. But say—Bill's head is out of the picture! Now how did I manage to do a crazy thing like that?"

The answer is very simple. The lad taking the picture failed to use the view-finder when he made the shot. He probably saw that the string of fish was in view, but he quite overlooked the fact that the proudly grinning Bill was neatly decapitated.

Most modern cameras have two kinds of view-finders. First, of course, is the familiar reflecting finder—the kind into which you peer from above. Properly shaded, it will give you a really little reason for failing to get what you want in a picture. Of course, there are limits, defined by the size and shape of the film and the capacity of the lens. You have to select the most interesting bits of a scene and concentrate on them.

When an artist does this, he "composes" his picture. Many volumes have been written on the subject of composition, but the whole idea may be boiled down to this. A good composition is simply a pleasing arrangement of the elements of a picture, an arrangement that puts the emphasis on the most interesting feature.

A little care in using your view finder will, almost invariably, give you a well-composed picture. For your eye will reject an arrangement that is confusing or displeasing, it will warn you that somebody's head is going to be lopped off, it will reveal whether or not the finished picture will tell a story—the story you had in mind when you unlatched the camera.

It's for "telling a story" is the essence of a good picture. The Chinese have a proverb, "One picture is worth ten thousand words." But the proverb applies only to good pictures.

Many a professional photographer spends hours studying the "view finder" of his camera before he makes a single shot. His success in business depends on his presenting vivid story-telling pictures. In our snapshotting we have no such weighty considerations. We have only ourselves and a few friends to please. But we can increase that pleasure vastly by pausing, just before we click the shutter to check up our picture in the view-finder. If we what we want—first away! And when the finished picture comes back, we shall certainly not begrudge those few seconds of concentration on the view-finder.

JOHN VAN GUILDER

483

DAYTIME CHIC FOR EARLY FALL AND A MODEL THAT CAN EASILY BE MADE AT HOME

A charming model is to-day's pattern which shows smart use of contrast. Paris is favoring for fall.

It is especially nice in crepe marocain, famous couturiers are sponsoring.

The original in black, combined with a novelty ribbed fabric in gold and white for its contrast.

Another scheme is mahogany brown crepe, which is deeply pebbled, with plaided tango colored taffeta contrast.

Black satin crepe is also fascinating for fit with white bengaline contrast.

Style No. 483 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 3 yards 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Agricultural And National Income

Farming The Chief Single Industry Of The Canadian People

Agriculture is the chief single industry of the Canadian people. Although in recent years its net production in value has been surpassed by that of manufactures, it is predominantly the principal industry of primary production. In addition to providing employment to more than one-third of the "gainfully occupied" males in Canada, agriculture provides the raw material for many Canadian manufacturing industries and its products in raw and manufactured form constitute a very large percentage of Canadian exports.

The net production of the five-eighths of the Canadian people who were engaged in what is termed the creation of "form utilities" was given in 1930 as \$3,216,746,735 to which the primary industries (agriculture, forestry, fisheries, trapping, mining, and electric power) contributed \$1,525,528,806, and the secondary industries (construction, custom and repair, and manufactures) gave \$2,144,233,478. Of the net production of the primary industries of \$1,525,528,806, agriculture was responsible for \$788,791,743, which is nearly equal to half of the amount produced. The various producing divisions of agriculture were field crops, fruits and vegetables, maple products, tobacco, grass and clover seed, honey, flax, flax, farm animals, wool, dairy butter, creamery butter, homemade cheese, factory cheese, miscellaneous factory products, milk consumed or otherwise used, poultry and eggs and fur farming pelts and animals.

Impurities In Air

Survey May Explain Why Epidemics Occur In Cities Far Apart

The first day's results in an "air survey" over Philadelphia gave scant comfort to lay fever sufferers. An airplane bearing a scientist and his instruments went 3,200 feet aloft, and "measured" 100 cubic feet of air to find what impurities it contained. Examination revealed 132,000 grains of pollen, 85 per cent. of which was ragweed. Dr. Theodore B. Appel, secretary of the U.S. State Department of Health, said the airplane tests might reveal why epidemics of sleeping sickness, infantile paralysis and influenza break out simultaneously in cities far apart. "It may be learned from this study," Dr. Appel said, "whether these germs are air-borne. Certainly, many epidemics that break out in communities widely separated cannot all be accounted for by human carriers."

The inventor of metal heel plates for shoes was enriched by \$1,500,000 through his invention.

The Dominion Marketing Board Has Had Many Problems To Deal With In Its Brief Existence

Lesson From The Gulls

Head Straight Into Storm And Let It Blow Past You

Blowing hard on the headland, the wind made walking, and even standing, difficult. Waves hard-driven and foam-decked broke against the cliffs in continuous thunder. The lobsterman passing on to his home over the hill predicted that a wild night was coming. Watchers did not care to linger.

But living things were there that seemed to mind the tumult not at all. In their own way, they were perhaps enjoying it. A score of gulls were riding a hundred feet in air, heading directly into the wind, on almost motionless. They were maintaining position as easily as though calm weather was about them.

What superb streamlining nature provides for the birds of the air! Sharp bills, and straightened, slender bodies, offered little wind resistance. Broadside on to the gale, the birds must have been swept away. But they were too wise to allow that to happen. Facing the wind, they seemed fairly to cut it amunder. There was nothing in them for the gusts to get hold of.

A white feather drifted down from aloft and fell within ten feet of us. For all one knew it may have been a message, if human eyes could have read the legend. In any event, what it said to one admiring spectator was this: "See how we birds do it. The way to meet a storm is simply to head into it and let it blow past you. If you make yourself a small enough target, the wind may blow it past you with no damage."

Christina Science Monitor

Canada's Defrosting Chamber

New Method Used In Handling Chilled And Frozen Products

A most important advance has been made in the handling of Canadian chilled and frozen products transported by ship and rail. The bogey of water-vapour condensation has been laid. The Canadian government has constructed a special vapour-tight chamber of 30,000 cubic feet capacity at the Port of London, England, for handling chilled and frozen meat. The chamber is the result of experiments conducted by the National Research Council of Canada upon the defrosting of frozen foodstuffs and is operated by the Port of London authority. It is designed to prevent the condensation of water vapour from the outside atmosphere upon the products after removal from the ships' holds. Thus, one of the buggers in the transportation of frozen and chilled products has been removed.

The matter for some time has had the close attention of Canadian scientists. Quite recently the serious effects of moisture from the atmosphere upon foodstuffs removed from cold storage were exemplified in certain shipments of chilled poultry to the British Isles when the average outside temperature at the port of arrival was 55 degrees F., and the relative humidity about 85 per cent. Under these conditions condensation was very pronounced and led to a study of the problem. The method thus evolved of avoiding condensation on chilled poultry is, of course, applicable to all types of chilled products.

Hard To Explain

Why Water Obtained From Great Depth Is Cool

An artesian well has been bored in Dakota over 2,000 feet in depth and a fine flow of water has been obtained from it. The well bored at the instance of Sir Adam Beck in London, Ontario, will be remembered on account of the opposition it aroused. West Chicago has a well 3,481 feet deep. St. Louis has one 3,453 feet down. At Putnam Heights, Conn. there is one at 6,004 feet. One near Leipzig is 5,735 feet in depth. And still we are told that the earth is full of subterranean fires. The water is cool and fresh and pure from these depths. What's the answer?

London contains 64,800 Irishmen, 60,000 Welshmen, and 54,000 Scots.

There are about two inches of water in a 30-inch snow.

Amber acquires an electrical charge by friction.

The silk industry has been practised in China for over 4,000 years.

The Dominion Marketing Board, which was established recently has had many problems to deal with during its brief existence. Since the National Products Marketing Act was legislation to most parts of Canada there is considerable uncertainty concerning its method of operation. The nature and volume of correspondence suggests that the board will be called upon to deal with a great variety of problems.

Two schemes which had been prepared by interested groups prior to the establishing of the Board have been dealt with and approved. One of these provides for the regulation of the exportation of apples and pears; the other deals with the marketing of British Columbia tree fruits. Both schemes appear to be operating with relatively little difficulty.

There is much interest concerning the procedure in submitting schemes and a little impatience at what appears to be delay in dealing with them. In that connection it should be noted that a scheme for the marketing of product, must be submitted by farmers or persons engaged in marketing. It is not the function of the Dominion Board to prepare schemes for the industry. When a scheme has been prepared, it must be submitted to the Minister of Agriculture at Ottawa with a petition indicating the amount of support back of the proposal. If the minister is satisfied that those making the submission represent adequately the producers of the product engaged in marketing, he will submit the scheme to the Marketing Board.

Schemes cannot be dealt with hastily. They request powers which are quite significant and have an important bearing on many people and many interests. When a scheme reaches the Dominion Marketing Board it is first examined to determine whether it is in proper order for consideration. This may require correspondence with those submitting the schemes, as frequently the provisions are not clear. The effect of the scheme on producers and consumers must then be considered. If the scheme is to deal with export trade, consideration must be given to the importing country and its reception by competitors must be given. It must be reviewed in the light of international relations and trade agreements with those submitting the proposals included in the scheme and their relationship to other acts and regulations of the government must be studied. A number of hearings may be necessary in connection with a single scheme.

It is obvious that a good deal of investigational work must precede the approval of any scheme. The time required for this will depend upon the nature of the proposal and the thoroughness with which preliminary work has been done by those submitting the scheme but in any case it may ordinarily be a matter of several weeks and possibly months.

The Dominion Marketing Board has a number of schemes dealing with a variety of products under consideration. During the past week five delegations have been heard by the Board with reference to different schemes.

Walked Seven Hundred Miles

Indian From North Accompanied By Wife And Two Children

Governor Ashley Cooper of the Hudson's Bay Company in his visit to Winnipeg from the north said: "One of the most interesting figures on board our ship was an Indian interpreter from the post at Fort Macleod, Labrador. In the early part of the year he had walked from there to Seven Islands on the St. Lawrence river, 700 miles by the route he took. It was accomplished in 70 days in the depths of winter, accompanied by his wife and two small children. It was a very remarkable journey, though he seemed to regard it as of no account."

WILD GEESSE ARE ASKED A QUESTION?

By MARGARET WADE

The whole history of the progress of mankind may be said to be that of the questions asked by its more alert and inquiring minds and such answers to these questions as have ultimately rewarded their persistent search and research. Always Nature has been the great teacher.

In our own times, Edison, concentrating the lines of thought, interested him, not asked questions concerning electricity and as a result gave us for instance light without combustion. Henry Ford, his mind concerned primarily with questions in mechanics, gave us motorized vehicles. Dr. Charles Saunders, Dominion cerealist, had certain questions to ask concerning the growth of grain in varying climates, and as a result of his investigations and experiments gave us Marquis wheat. Dr. Baunting, in pursuing his researches gave insulin to a suffering world.

In much the same way Jack Miner has all his life been asking questions relative to the habits of wild animals, migratory birds and water-fowl. His answers he has secured to his questions have resulted in the preservation of certain types of wild life that had otherwise been threatened with extinction, in designs for the scientifically arranged and stocked bird sanctuary, and in authentic information relative to the migratory habits of wild fowl and various other related data.

It is not claimed, of course, that Jack Miner has been alone in this work. But certainly no one else has concentrated upon it so determinedly, nor with so single a purpose through the years. And he, therefore stands out as the leader in this field of endeavor. As one writer has expressed it:

"Let it be granted that others before Jack Miner's time and since his generation that has grown up since his experiments began, have done much good work in this line. Yet it remains true, in this as in every form of advance, that one person goes forth in the public eye embodying the whole movement. Not Watt, but a succession of inventors, made the steam engine; not Bell, but a succession of experimenters, made the telephone. Jack Miner, in this sense, has given us the Bird Sanctuary."

It was in August of the year 1909 that Jack Miner began accumulating authentic information regarding routes and distances covered by wild-fowl in their spring and autumn migrations. In that year he secured a black mallard duck, clipped round its leg an aluminum tag on which he had scratched the request "Write Box 48, Kingston, Ont." and released it. In January of 1910 that duck was reported killed by W. B. Bray of Anderson, N.C. Whatever had been done along that line before, that conviction the first complete record of any bird tagged and killed on this continent. Naturally this success created the desire to follow along with further experiments of a like nature, and between 1910 and 1915 several hundred wild ducks were tagged and he in the same way. By that time, also, others had followed his example and they too, were tagging ducks by the hundreds.

During these years Jack Miner had conceived the idea of the "wild-owl" in the same way. This, the reader may be sure, was a much more difficult problem, for the wild-owl is the most elusive and wary of wild things, so persistently hunted that their natural traits have been developed to a truly amazing degree. For years after they had earned and rest and safety from their enemies in the sanctuary he had created for them. Jack Miner studied and experimented in an effort to catch one of them. Again and again he remodeled and built traps that he hoped to do the trick. He spent thousands of dollars in such equipment designed to delude that "silly goose" that each time would merely cock a knowing eye at the thing, look deviously, and swim away to some other part of his ponds. After a number of years of this kind of course, he got a trap that was a success. Since 1915 he has tagged and released again more than 25,000 of these, most elusive of wild-owl. From the information returned to him by those who have shot members of these tagged birds, he has been able to furnish to the Canadian and United States governments, as well as to the interested public, reliable information as to where these birds nest, where they winter, what period of each year they spend in each country, and what percentage of them are slaughtered in each region. To those interested in the preservation of wild life and adaptation of game laws to changing needs, this information has been invaluable.

One of the great ambitions of Jack Miner's life was realized in his ratification of the Migratory Bird Treaty between the United States and Canada, by which all migratory wild-fowl and insectivorous birds are given protection in the North and South alike.

Another great purpose of his is to bring into closer understanding and co-operation the East and the West. In this matter of wild-life conservation. With this in mind, he has long desired to make the experiment of shipping a number of tagged wild geese from his sanctuary to the West, releasing them there, so that he might ascertain what effect, if any, this change of route would have. There is the question in his mind whether birds so deflected from their natural route would return to it, and so return in time to his sanctuary at Kingsville; or whether they would join with other flocks in the West and remain part of the migrating flocks of the more westerly routes. Although a dream of his for years,

...NIGHT COUGHS

Quickly Checked and a Restful Night Assured

Just rub on VICKS VapoRub

RELIEVES COLDS WITHOUT "DOSING"

JACK MINER

he had found this experiment impossible owing to the amount of detail involved and the expense. Now, birds, so that they will be readily distinguished from others that he has tagged in the ordinary way. Mr. H. C. Nunn, an active member of the Hamilton Bird Protective Society, while visiting the Miner home in April of this year, learned of this desire or the part of his book. Immediately he set about making the necessary, complex arrangements.

The co-operation of the Winnipeg Free Press was enlisted, and that newspaper paid all the express charges on the shipment of birds and also appointed Mr. Bert Gresham, an eminent bird lover of the West, as their representative in charge of the experiment at Winnipeg. All was done under government supervision and by special permit from Ottawa. Mr. J. B. Harkin, Mr. H. C. Lloyd, and Mr. Cunningham of the Manitoba Fish and Game Department, took a keen personal interest in the project in addition to that devolving upon them in their official capacity. While all these matters were being arranged Jack Miner was preparing special tags for these particular birds, so that they will be readily distinguished from others that he has tagged in the ordinary way. Mr. Nunn supplied the specially constructed crates in which the birds were to be shipped. Everything was readied at Winnipeg. All that was wanted were the geese themselves. Then came a cool April morning, well suited to the purpose.

Looking through his high-powered field glasses Jack Miner scanned his fields and ponds and saw several hundred geese feeding inside his goose-trap. The trip-lines were pulled, and the geese were prisoners. Thirty of them were given special tags and placed in the six 20 x 30 crates prepared for them. Water was placed inside, rushes on the floor and an abundance of green alfalfa hay for food. A high-speed truck rushed the shipment thirty miles to the railway where the Canadian Pacific Express Company took charge of it. Fifteen hundred miles those geese travelled in the baggage car of a fast express, and, unharmed and record time, they were delivered to the waiting authorities in Winnipeg. Again they were loaded upon a huge, waiting truck. Then a final twenty miles they travelled over the heavy, wet roads of the prairie in springtime.

At Grand Lake, Manitoba, the birds were given their liberty again. At the time, several thousands of Western wild geese were already there, quietly resting on the surface of the lake. As their Eastern cousins were released they flew, vigorous and unharmed from their unique experience, out to join them.

Now, conservationists, game departments and Nature lovers generally, awaited the answer which these birds will give to their question: Will these geese remain in the West, in the country and among the relatives of their adoption? Or will some homing instinct lead them back, eastward to the Hudson's Bay nesting grounds to which they were doubtless bound and so, in another migrating season, to Kingsville again?

What do you think?

The proboscis monkeys, with their long, curious noses, are found only in Borneo.

Girl to Woman

Men G. F. Z. Zane of 45 Cambridge St. Galt, was a girl developing. I used the Violette's Favorite Pink Compound. It built me up, gave me my appetite, and made me feel like a woman. I was so weak and nervous, had lost condition and was so tired. I wrote to Dr. F. Zane's Clinic, Buffalo, N. Y. for free medical advice.

SUNDAY SCHOOL LESSON

OCTOBER 21

THE CHRISTIAN AT PRAYER

Golden text: "Continuing steadfastly in prayer." Romans 12:12. Lesson: Matthew 6:5-15; Ephesians 6:18-21.

Devotional Reading: John 17:17-26.

Explanations And Comments

The Christian Prayer, verse 6. Jesus bids his disciples take the opposite course, seek all possible privacy. When you pray, shut out the world, and shut yourself in with God—enter into your inner chamber, the place where you can be alone with God, and having shut the door, pray to your Father who is in secret. For Nathaniel the place for prayer was under the fig-tree; for Peter, it was on the housetop. Jesus made the mountains and the garden his place of prayer.

The Fullest Prayer, verse 7. Jesus also cautioned his disciples to avoid such vain empty, repetitions as the Gentiles used, who repeated the same words over and over, relying upon the words rather than upon their meaning. Do not pray by rote, like pagans, is Moffatt's translation. Compare the vain repetitions of the priests of Baal, 1 Kings 18:20, and of the Ephesians in their worship of Diana, Acts 19:34, and the rabbinical saying that "Prolix prayer prolongeth life."

Model Prayer, verses 9-13. After this manner therefore pray ye. Note the simple, direct petitions of the model prayer, the Lord's Prayer as we call it, which Jesus gave us so utterly different from the vain repetitions of the pagans. After this manner therefore pray ye. This does not mean that the prayer which follows is the only prayer that should be used, nor that it should always form part of one's prayer. The prayer given is a model, and all prayer that deals with divine and with human interests, with spiritual more than with temporal wants. There are six petitions in the prayer. The first three put God first: they speak of "thy kingdom," "thy kingdom," "thy will," before the petitions about "bread," "our sins," "our temptations."

Our Father, who art in heaven. The prayer is alone only as far as other human beings are concerned; it is in the presence of the Heavenly Father, and must be the realization of that Presence all his mind and heart.

Little Journeys In Science

THE MOON

(By Gordon H. Guest, M.A.)

Most familiar to us of all the planets is the moon. This satellite of the earth has been closely observed by astronomers because it is nearest to the earth than any of the other planets, rotating at an average distance of 218,813 miles from us. Calculated by trigonometry, its diameter is believed to be about 2,160 miles, and it has a surface of about one-fourteenth of that of the earth.

The moon receives its light from the sun, and what we call moonlight is really reflected sunlight. No traces of organic life are seen on the moon, and its surface is believed to be bone dry, with neither moisture nor gases on it. Observed through telescopes, it is believed to be covered with ranges of mountains, valleys, and craters. The highest mountains are believed to rise about 36,000 feet. The moon was in ancient times the object of many superstitions, and was worshipped by primitive people. No definite theory is accepted as to its origin, but scientists for some time have endeavored to explain how it was formed.

Henri Poincaré, a French scientist, believed that the earth was at first a molten globe, and that in its swift motion through space it threw off one end, the dislodged piece commencing to revolve on its own axis and taking up the position of the moon.

George H. Darwin, son of the great biologist, advanced the theory that in the formation of the earth the sun exerted great force on the earth's surface, pulling up huge tidal masses. With a particularly strong force, the theory continues, a mass of earth was pulled completely into space, forming the moon. Both these theories are accepted to some extent, but scientists still seek other explanations.

The oldest painting of the Virgin and Child in existence, done about 150 A.D., is now on a wall in the famous Priscilla catacomb in Rome.

Portable typewriters have been classified as musical instruments by the British Railways Freight Association.

Some people are too honest to take advice they haven't paid for, and others are too vain.

A Roman amphitheater was discovered at Lyons, France, recently following a landslide.

Rome is to have a huge auditorium seating 5,000 people.

Ogden's

As Ogden's Does

And Ogden's Fine Cut certainly does what any man who "rolls his own" cigarettes wants his favorite tobacco to do. Its coolness lets to the final satisfying puff of every cigarette. You'll find this cigarette tobacco easier to roll, cooler, milder, more fragrant—better by far.

Ogden's Fine Cut and "Chantrelle" or "Vogue" papers are a combination you just can't beat.

SAVE THE POKER HANDS

OGDEN'S FINE CUT

P.S.—At any Poken Hand Poken Store, or by mail, you can get Ogden's "Chantrelle" or "Vogue" papers in cigarette form. Complete list of Poken Stores.

Steamship Nascope Returns From Trip To Far North

The ice-scattered steamship Nascope, commissioned by the Hudson Bay Company, and carrying the Canadian government's 1934 Arctic expedition, has returned to Halifax.

As a result of heavy snow and ice conditions the Nascope was not able to get as far north as planned. Captain Thomas H. Smellie said he had encountered snow and ice on the return trip also and was ice-bound for a week in James Bay and a week in Hudson Strait.

There were three women on board, Mrs. George E. Brown, of Gates Mills, Ohio, who with her husband had joined the vessel as tourist at Churchill; Mrs. C. S. Sauer, and one at the mission post at Pangnirtung, N.W.T., and Miss Millicent Blake, nurse with the Grenfell mission in Labrador.

There were 10 Royal Canadian Mounted Police officers, eight returning from their posts at Port Burwell, Lake Harbor, Pangnirtung and Pond's Inlet. The others were Superintendent T. H. Irvine, officer commanding "G" division at Ottawa, and Quartermaster-Sergeant W. C. Tyack, who had conducted an inspection of the eastern Arctic detachment.

Approximately 95 per cent of the world's population is located north of the equator.

The average birth rate on British ships is 140 a year.

HEALTH MEANS CHARM AND HAPPINESS

Sparkling eyes and smiling lips speak of health and vitality. Clear skin shines. The healthy, happy girl is both happy and popular.

There are so many ways to get into the good times that other women enjoy. For extra energy, try Lydia E. Pinkham's Vegetable Compound. It tones up your general health. Gives you more pep—more charm.

Remember that 98 out of 100 women report benefit. Let it help you too.

AID FARMERS TO SECURE MONEY TO CARRY ON

Ottawa.—Details of the amendments to the Canadian Farm Loan Act passed at the last session of parliament, in conjunction with the Farmers' Creditors Arrangement Act, have been published by Finance Minister E. N. Rhodes and distributed among those concerned. Under these amendments the board will be empowered to take second mortgages in satisfactory cases to enable the farmer to secure money to carry on his operations.

The explanatory statement says, in part: While the Canadian Farm Loan Act has made provision for adequate rural mortgage loan facilities under normal conditions, under existing conditions the amount of the average mortgage loan available on the basis of present-day values of farm lands has not proved sufficient to re-finance the overdue and pressing obligations of farmers incurred at higher price levels or incurred in the period of readjustment following the first severe drop in price levels and farm income.

The amendments to the Farm Loan Act have been consequently designed to make available to individual farmers larger mortgage loans on a consequently smaller than normal margin of security.

This has been done by empowering the board to make to farmers applying for loan not only an advance by way of loan restricted to a maximum of 50 per cent. of the appraised value of his lands plus 20 per cent. of the value of the buildings thereon on the security of a first mortgage thereon, but also a further and additional advance, if so required by the applicant, on the security of a second mortgage on the said real estate and on the security of a mortgage on his livestock and chattels up to a maximum of one-half of the amount of the first mortgage advance. But the aggregate of the amounts advanced should not exceed two-thirds of the appraised value of the farm lands and the buildings thereon accepted as security for such loans, nor in any event more than \$7,500.

The additional advances, which may be for convenience termed "second mortgage loans," are repayable on terms not exceeding a period of six years and carry interest at a rate not more than one per cent. in excess of the current rate of interest charged on first mortgage loans.

Mining Town Growing

Jellicoe, Ontario, In Midst Of Real Estate Boom

Jellicoe, Ont.—A real estate boom has struck this taxless mining town as prospectors, geologists, miners and others rush to grab land and erect shelter against fast-approaching winter that snow will crack down on the scene of Canada's newest gold scramble.

All along the Canadian National Railway's right-of-way from the station to what was until recently Jellicoe's only pretence at a town, hammers and saws resound as the town grows like a mushroom. Mining companies are constructing living and storage quarters at the mining country base, trying to finish them before the impending freeze-up.

Lots have been rented by the railway along the right-of-way and beside the rusty sidings. Houses, shanties and new stores are being built. A new hotel-bunkhouse has been finished and all available sleeping space around its walls is rented, much of it permanently.

The problem of sleeping accommodation has been solved to some extent by arrival on one siding of a tourist sleeping car in which the railway company rents berths at nightly rates of \$1.50 for a lower and \$1 for an upper.

King Confers Titles

London.—The official gazette announced that the king had conferred upon Prince George the titles of Baron of Downpatrick, Earl of St. Andrews and Duke of Kent, in honor of his forthcoming marriage to Princess Marina of Greece.

U.S. Crop Report

Washington.—The United States wheat crop was estimated at 496,982,000 bushels for this year by the department of agriculture, which also reported the indicated corn crop at 2,416,722,000 bushels, showing the ravages of this year's severe drought.

W. N. U. 2088

Society Woman Abducted

Wife Of Wealthy Kentucky Oil Man Is Kidnapped

Louisville, Ky.—Mrs. Berry V. Stoll, young society leader and wife of a wealthy oil man, was seized from her fashionable home by a kidnapper who left a note containing a demand for \$50,000 ransom.

Beaten by the abductor, who gained entrance into the house on a pretext and left her maid bound and gagged, Mrs. Stoll was spirited away in an automobile.

Federal, city and county authorities immediately began a wide search. Mr. Stoll discovered the kidnapping when he returned home from the office late in the afternoon. There he found the maid bound hand and foot.

The maid said the abductor got into the house on the pretext of wanting to use the telephone. The maid was quoted as saying she "never saw a more fiendish-looking man."

As soon as he entered the house the man drew a pistol from his pocket and forced the maid to help him bind Mrs. Stoll's hands with tape. He was unusually rough, the maid said, and this was evidenced by traces of blood found on the floor.

The abductor was described as being between 30 and 35 years old, about five feet eight inches tall, weighing about 130 pounds, having black hair parted in the centre.

Mr. Stoll later issued a statement addressed to the kidnapper and asked that it be published.

"Berry Stoll has just found the note regarding the ransom and arrangements are being made accordingly."

He declined to make contents of the ransom note public, but he learned that in addition to demanding money it contained a threat that William A. Stoll, president of the Stoll Refining Company, was "next on the list." He is a brother of Berry Stoll, the vice-president, and chairman of the Louisville Board of Trade. Stoll said the ransom note was found in an upstairs bedroom.

People Living Longer

So Insurance Companies May Raise Annuity Rates

Chicago.—People are learning to live so long that annuity insurance companies are likely to be higher in the future.

Arthur B. Wood, president of the Sun Life Assurance Company of Canada, indicated that in an address before the American Life convention in which he warned that "if annuity premium rates are based on the assumption that recent past experiences will be repeated, they will probably prove insufficient."

He suggested that "to avoid incurring an ultimate loss, additional provision should be made for anticipated increase in longevity."

Follower Of Gandhi

Madeline Slade, Former Society Girl, Reaches New York On Mission

New York.—Madeline Slade, former English society girl, who nine years ago became "Mirabai," chief woman lieutenant of M. K. Gandhi, has arrived to "give Americans a clear conception of Gandhi."

She travelled third class on the Majestic, and said she regretted having been unable to use even more humble accommodations.

"Mirabai," daughter of a former admiral and oil magnate before she renounced social life to follow Gandhi, was dressed in homespun clothing, a man's coat, and cheap Indian sandals. Miss Slade said she came on the invitation of the Rev. John Haynes Holmes, chairman of the American League for India's Freedom, for a lecture series.

Outlaws Capture Missionaries

Chinese Take Three Church Workers Prisoners In Southern Province

Peking, China.—A dispatch to the British legation from Chungking, said three foreign missionaries, including Miss Grace Emblem, a British subject, had been captured by outlaws.

They were taken prisoners at Lu-hwang, 80 miles east of Kweichow, Kweichow province (southern China), the dispatch stated.

Advices from Shanghai said Miss Emblem is attached to the China Inland mission. The other captives are an Englishman and a Swiss.

Elevator And Wheat Burned

Buchanan, Sask.—Fire destroyed the Inter-Ocean Elevator and about 20,000 bushels of wheat. Volunteers carried out the office records. George Torenovsky, the agent, was absent when the fire broke out.

Interest Rates Reduced

Savings Account Interest To Be Cut To Two Per Cent.

Ottawa.—Interest paid on savings deposits will be reduced to two per cent. as from Nov. 1, 1934, by all chartered banks in Canada, the Dominion government post office savings banks and the Ontario government savings office, Finance Minister E. N. Rhodes announced.

A similar reduction will be made effective by all other banks on Dec. 1, and the minister intimated that a number of the important loan and trust companies in Ontario will reduce by one half of one per cent. the rate of interest which they at present pay on savings deposits, such reductions to be effective from Jan. 2.

On May 1, 1933, savings deposit interest rate was reduced by the chartered banks and similar institutions from three per cent. to two and one-half.

SOME CONTROL OF INDUSTRY MAY BE INSTITUTED

Ottawa.—Suffering more widespread than that caused by the Great War had been brought about by uncontrolled business, Tom Moore, president of the Trades and Labor Congress, stated in an address here.

"We are going to have industrial control in Canada whether we like it or not," he declared. "Industry has shown conclusively that it can not control itself."

"For the good of business itself, for the good of the people, in order that sweat shops which the Stevens investigation has shown to be so prevalent may be abolished, some control will have to be instituted. But we must go carefully or we might establish a dictatorship."

"Legislation should be brought in to effect only after collective agreements between those concerned—employer, employee and consumer. It must be uniform throughout the Dominion. After that, the people should boycott all those who will not live up to the regulations and drive out those who will not play the game fairly. We must see that business is for public benefit and not for private profit."

Bringing of the British North America Act up to date, unemployment insurance and industry-control were three ways in which Canada could combat "rebellious feeling," which, he believed, was far more extensive than generally realized.

In considering unemployment insurance, Mr. Moore suggested certain provisions which he thought necessary for social legislation for Canada, such as insurance be contributory, as many as possible be insured, but not to include those who for physical or such other reasons were unemployable and who would be looked after by other means; benefits to be in cash; qualifications to be governed by the number of contributions made. Although it had been said when unemployment insurance was first proposed that it would impoverish the country, stated Mr. Moore, since 1930 Canada had spent \$300,000,000 in direct relief and was now spending \$60,000,000 per month.

CZECHS FEAR FOR AILING LEADER

Dr. Thomas Garrigue Masaryk, the founder and first president of the Czechoslovak republic, is said to be slowly ailing, and political observers believe he will not be able to serve much of his third successive term, to begin Nov. 4. Now 84 years old, President Masaryk has watched his "brain child" grow to manhood, with a powerful voice among European nations, and serve as the last outpost of democracy in dictatorship-ridden central Europe. He resides most of the time in his huge castle in the capital, Prague. Our pictures show the veteran leader, and a view of Prague.

H. C. GROUT

General Superintendent, Ontario District, of the Canadian Pacific Railway, who has been promoted to the post of assistant to the vice-president, with headquarters in Montreal.

Rise In Wheat Prices

Average Export Value Shows Sharp Increase

Ottawa.—The sharp rise in the export value of wheat in August, when it reached \$12,568,000, was more than maintained in September, the Dominion bureau of statistics reported. The quantity exported in September was 17,588,359 bushels and the value \$15,323,000, about \$300,000 more than a year ago.

The average export price in September was \$7.1 cents as against \$6.9 cents last year. During the first six months of the current fiscal year the export value was \$68,937,000 compared with \$60,279,000 last year, a gain of about \$8,500,000, the bureau states.

Refunding Loan

Believed That Original Amount Has Been Over Subscribed

Ottawa.—With the 1934 refunding loan an unqualified success no definite figures of recent applications were issued but it was learned the only reason the books were being left open was to enable former conversions of 1919 Victory bonds. The government was assured the original objective of \$250,000,000 would be more than reached but it was desirous of securing as many conversions as possible even if it were necessary to scale down some of the larger subscriptions to keep the total issue within the figure set.

Greater Service Promised

Edmonton.—Under the proposed health insurance scheme for Alberta, more people will get hospital service and more nurses will be employed than at present, stated Hon. George Hoadley, minister of health, when addressing members of the Alberta Hospital Association and the Association of Registered Nurses in joint annual convention.

Horse Brings High Price

Brandon, Man.—Believed to be the highest price paid in Manitoba for a horse in years, "Jack," a three-year-old draft gelding Clydesdale, was sold for \$400 to A. Leslie of Watrous, Sask. Winner of the Manitoba grand championship, "Jack" will be exhibited at the Royal Winter Show in Toronto.

Chinese Charged With Possession Of Opium

Two In Saskatchewan Alleged To Have \$5,000 Worth

Saskatoon.—War against narcotic peddlers, recently waged successfully in Montreal with the breaking of an important international dope ring, opened in Saskatchewan with the arrest of two Chinese merchants of Saskatoon in alleged possession of \$5,000 worth of opium. With the arrests police believed they had secured the leaders of an important dope ring in the prairies. It was believed the largest seizure in the history of the province.

The arrests were made under the direction of Detective Sergeant L. J. Black, of Edmonton, in charge of the narcotics division of the Royal Canadian Mounted Police in Alberta. Sergeant Black recently returned from Montreal where he participated in the breaking of the \$1,000,000 ring led by Pius Brocher, wealthy New Yorker, who committed suicide after his conviction.

Those arrested were D. Lem, alias Dai Kwok Lung, and Fred Hewa, who also is believed to have business connections in rural points.

May Return To Britain

Report Says Earl Of Egmout Will Take Seat In House Of Lords

London.—Preparations are being made at Avon Castle, Hampshire, for the early return of the Earl of Egmout, his wife and their infant son, according to the Daily Mail.

The earl, who is only 20 years of age, is liveliest of his generation in his Alberta ranch near Calgary.

The Mail says it is the intention of the earl to return to Avon Castle before he reaches his majority next April and to take his seat in the house of lords.

FEAR THE PEACE OF EUROPE MAY BE DISTURBED

Paris.—Fear the double assassination of King Alexander of Yugoslavia and Foreign Minister Louis Barthou of France might wreck the continent's peace as did the killing of Archduke Franz Ferdinand at Sarajevo 20 years ago, lessened at time passed without bringing any major developments.

But the 20 deadly bullets fired by Petrus Kalemek at Marseilles left France shaken politically and Europe nervous over what may come next. In many quarters belief that Kalemek may have altered the course of events in Europe was freely expressed.

The question of the assassin's nationality, highly important because of its political implications, preoccupied police over the continent, and everywhere authorities sought clues which might enable them definitely to identify him.

France's Surete National and authorities at Praha, Czechoslovakia, insisted the Czech passport found on Kalemek's body, which apparently had been issued by Yugoslavian authorities at Zagreb, was forged.

Among documents seized in the homes of Yugo-Slav Separatists in Paris, police said, was one calling Alexander "tyrant king and traitor of his country."

Meanwhile, trouble for the government of Premier Doumergue appeared to be brewing over responsibility for failure to protect King Alexander, as groups of demonstrators on the boulevards shouted insults at police and Albert Sarraut, minister of the interior, for failure to prevent the assassination.

Interpellations already have been filed in the chamber of deputies and certain French newspapers have criticized the government sharply, while opponents have suggested it is time to overhaul the government of "tragically weakened authority."

Premier Doumergue himself took over the duties of Foreign Minister Barthou.

Throughout Europe police are searching for information about a group of international terrorists believed to have plotted the assassination of King Alexander. Meeting secretly in some remote Balkan hideaway, police believe, the band of assassins drew lots to determine who would give his life to slay the king of Yugo-Slavia.

The task falling to Petrus Kalemek, the assassin is believed to have planned the assassination in the full detail and equipped the slayer before sending him over the French frontier from Vallorbe, Switzerland.

UNITED STATES WILL EXPORT NO WHEAT THIS YEAR

Washington.—United States farm administration officials said no plans were being made for exporting wheat from the United States this year in view of the short crop of 496,000,000 bushels forecast.

The only surplus wheat available will be the soft white variety grown in the Pacific northwest. Plans are now being made for selling approximately 15,000,000 bushels of this surplus to the federal surplus relief corporation for relief.

Officials declared that the total supply of wheat in United States at the close of the present harvest would be 786,000,000 bushels, 290,000,000 bushels of which would be a carry-over from last season.

About 625,000,000 bushels will be required for normal domestic consumption and a carry-over into the 1935-36 crop year of 125,000,000 bushels is planned. These deductions would leave only about 36,000,000 surplus and officials estimated this figure probably would be reduced by increased feeding to livestock because of short supplies of other feeds.

Industry Code

Move Made To Control Unfair Trade Practices In Manitoba

Winnipeg.—Establishment of a government department of trade and industry to prohibit unfair trade practices and regulation of Manitoba trade and industry by means of code and license was proposed here by the Manitoba Retail Merchants' Association.

The suggested department would fix minimum wages, fix a minimum price for sale of goods and services and supervise working conditions.

The proposals will be submitted to the provincial government and were contained in suggested draft legislation to be presented to the legislature. Discussions are continuing and the present draft will be subject to rigorous revision, said H. B. Scott, secretary of the association.

In its present form, the proposed legislation would apply to wholesale and retail dealers of all kinds, bakers, printers, restaurant keepers, dry cleaners, barbers and many other industries.

The proposed legislation would give power to the minister of trade and industry to license all persons carrying on trade in Manitoba. Codes would be established to regulate each industry, and, if approved by 66 per cent. of the licensed persons engaged in the trade, would be declared in force by the lieutenant-governor.

Declares War On Racketeers

Ontario Government Will Protect People Against Improper Financial Practices

Toronto.—Premier Mitchell F. Hepburn declared his Ontario government would "wage war without quarter through its securities commission on financial racketeers and all persons engaging in improper financial practices."

The premier made the statement following a meeting of the cabinet.

"To this end new regulations were passed to strengthen the arm of Securities Commissioner Godfrey and to place his commission on a self-supporting basis," the premier said in a long statement.

Receives University Appointment

Winnipeg.—Mr. Justice A. K. Dyar has been elected chairman at a meeting of the board of governors of the University of Manitoba, succeeding D. C. Coleman, senior vice-president of the Canadian Pacific Railway, who was recently transferred to Montreal. H. A. Bergman, K.C., was named as vice-chairman to succeed Mr. Justice Dyar.

Returns From Orient

Victoria.—Hon. C. H. Cahan, secretary of state for Canada, and Mrs. Cahan returned here aboard the liner Empress of Japan after a holiday trip to the Orient. "It was purely a holiday trip, so I have nothing to say about business or my impressions of the Orient," he said. "I enjoyed my trip very much and I saw a great deal."

President Of Hospital Association

Edmonton.—B. H. Adams, K.C., Calgary, was elected new president of the Alberta Hospitals Association at the closing session of the annual convention here.

Wheat Drive In Ireland

De Valera Government Insists On Farmers Growing More

Irish farmers must grow more wheat. If exhorting fails, Eamon De Valera's government will try coercion. A cajoling campaign is now in full swing, the daily having voted \$50,000 for propaganda.

Every one of the 1,600 political clubs in the Fianna Fail party will pull its weight in the big drive to convince farmers that it is unpatriotic to allow land to lie fallow, and behind the campaign is the veiled threat that landowners who fail to do their part will be deprived of their holdings.

Under a new scheme of rating relief coming into operation at the instance of the department of local government, rebates will be allowed to farmers in their taxes corresponding to the number of adult male persons they have on their farms.

The newly-instituted propaganda campaign lays emphasis on the protection of the home market for wheat, estimated as worth \$17,000,000 to the farmers. Every barrel of millable wheat grown at home will be assured a market at a guaranteed price of \$6 per barrel—much higher than the world price. The guaranteed price may not be changed except by giving two years' notice to growers.

In 1932 Free State farmers grew only 20,000 acres of wheat. This year they need 80,000. The government is impatient with the delay and says that at the present rate of progress it would take 80 years to reach the 800,000 acres required for the home market.

Before the repeal of the corn laws in England, Ireland grew 600,000 acres of wheat but the importation of cheap wheat grown on the virgin soils of North America, particularly Canada, killed the Irish trade almost overnight. This is the government's answer to critics who say the Irish climate is unsuitable for the crop.

Reciprocal Trade

Hon. Vincent Massey Thinks Canadians Would Welcome Wider Markets

The Canadian people will, when the time comes, welcome arrangements for reciprocal trade with the United States, Hon. Vincent Massey, formerly Canadian minister at Washington, told the New York Herald Tribune conference on current events.

"I believe, when the time comes," he said, "the Canadian people will welcome arrangements for reciprocal trade with the United States. If well devised they can only be of mutual advantage to both nations. We are rightly proud of some of the international traditions which we have been able to establish in North America. Let us add one more and prove to the world that there can be at least one island of commercial sanity in a tariff-mad sea."

Mr. Massey said there was nothing incompatible between increased trade within the empire and increased trade between the empire and the world. "In fact one will lead to the other." "There is a growing disposition discernible here and there to question the validity of the belief that to purchase goods from foreign sources is an infraction of the moral code."

Sold For Meats

A business lot in the city of Macon, Virginia, once was sold for three square meals a day for seven years. Court records show that 40 years ago Thomas Callaghan traded with Warren Green and E. F. Mims for a lot near where the city auditorium now stands. The meals were valued at \$100 a year or slightly less than 10 cents each, the total consideration being about \$700.

A Real Expert

Witness at Highgate Police court, asked if he could drive a motor-car: "Oh, yes. All you have to do is start the works, shove it into gear, grasp the steering wheel, hold tight, and hope for the best. You also have to shout at pedestrians, buy petrol and mend punctures, but that comes with experience."

Belonged Anyway

"Yes," said the candidate, "I'm going among the farmers to-day, to a cattle show, or jackass show or something of that sort; not that I care for cows and jackasses, but I want to show the people that I'm one of them."

Two English trains provide trained typists for busy business men.

A simplified process for coating plastics with metal has been found.

W. N. U. 2068

REVOLUTION THREATENS IN SPAIN AS PARTIES CLASH

With a general strike of workers spreading rapidly through Spain's industrial centres, and the provinces seething in rebellion, the Spanish Government is doing its utmost in effort to cope with the serious situation. At the top is a picture of the Plaza Catalina, most important centre in Barcelona where demonstrations are inciting the people to revolt. Below, loyal troops in Bilbao search citizens for arms in order to save possible bloodshed.

Explanation Was Simple

Lonely Grocer Had Brilliant Idea Which Netted Profit

In one of those little towns in Maine, as in the rest of them, probably, the summer residents all trade at the lone grocery store, and it's the custom to let the bill run for the season and then, upon departure, pay it in a lump. A city man who bought a place there last summer and followed this practice was surprised during the winter, long after his return to town, to get a bill from the grocer. He didn't do anything about it at the time, beyond getting out his cancelled checks and verifying his recollection that he'd paid it, but this summer, upon migrating northward, the first thing he did was call at the grocery. The old man who ran the place was out, but his son was there, and the son was a little abashed when the matter was put up to him flatly. After some hesitation, he beckoned the city man to the rear of the store and whispered the explanation. "It gets mighty lonesome up here sometimes in the dead of winter," he said, "so Paw goes over the books and sends out bills to all our summer customers. You'd be surprised the number of them they pay up again."—The New Yorker.

Taking No Chances

Woman Has Expensive Radiophone To Scare Away Burglars

A woman in London, England, has just paid \$250 for a radiophone—to play one record only.

When it is played, a dog's bark is heard, followed by a man's cry of "Who's there?"

The purchaser is a widow, living with an elderly maid in a district which has had epidemics of burglaries.

With her new radiophone loudspeakers will be installed in every room, the radiophone will be connected with "invisible light" alarms across each window, and any would-be thief will get the shock of his life if he tries to enter.

Road Built Of Salt

Highways of iron are being tested in some parts of the United States and now comes word that a road of salt, the first of its kind to be built in Canada, is to be constructed by a salt company with works at Sandwich, Ontario, on the north end of the seventh concession of the township of Anderson. This new-type road is being established as an experiment sanctioned by the Essex county council the company furnishing the material and the county the labor.

Real Progress

The Ottawa Journal says: The London Daily Express reproduces a photograph of the first fatal motor car accident in Britain. A funny looking auto running down a hill got out of control. The driver and a passenger were killed. That was in 1899. Last year says the Express 225,530 people were killed and injured on the roads of Britain.

Find New Market

Canadian Onions Well Received In British West Indies

A new challenger in the onion export field has thrown down the gauntlet. For a number of years the bulk of the onions imported by the British West Indies has been supplied by Holland, Portugal and Argentina. Recently, however, Canadian onion growers have had a surplus available for transport to the West Indies territories and their products have been well received. In fact, writes the Canadian Trade Commissioner, due to the satisfactory flavor and soundness of Canadian onions upon arrival, the demand is increasing. Ontario and the Maritime provinces have been the chief contributors. Canadian onions arrive in the West Indies market late in October and continue until the end of January. This exporting period coincides roughly with that for Dutch supplies, so it is all the more to the credit of the quality of the Canadian onion that it can break through such severe competition.

Ancient Map Found

Shows City Of Old London Was Once Marsh Land

Much of the present city of London, England, is shown as marsh on a 214-year-old map in possession of Mrs. E. H. Littlebury of Vancouver. Only one bridge appears on the map. The lettering is in the old style, with the letter "f" taking the place of the "u". A modern version of the text would read:

"A new map of London, most humbly inscribed to the Right Worshipful Sir Peter Delme, K.T., and aldermen of London, 1720, revised by M. Senex."

Mrs. Littlebury has had the map for some time but only recently discovered it after having placed it away in a book.

Almost Impossible To Use Terms To Fit Various Countries

The difficulty of standardizing descriptive terms in the surveys of the various grasses and plants of the British Empire and other countries is a rather formidable task. It is almost impossible, says the Imperial Economic Committee's 27th report on grassland seeds, to avoid such terms as "perennial," "deciduous," "hardy," and the like, some of which do not always mean the same thing. In Australia, for example, a hardy strain means a strain capable of resisting extremes of heat. In Canada, on the other hand, the term denotes a strain capable of resisting extremes of cold. In both countries it connotes drought resistance. In respect of temperature, however, the term is used with opposite meanings. Again, in Canada winter-hardiness means ability to resist dry cold or snow. In the United Kingdom it means ability to resist wet cold. Strains that are "winter-hardy" in the United Kingdom will not necessarily be "winter-hardy" in Canada. On the other hand, a red clover that resists the Canadian or Russian winter by drawing the crown under the soil to keep warm, in doing so under conditions in Great Britain, fails to survive the wet winter against which the native species keeps the crown above ground.

"Jack was the goal of my ambition," she sighed, "but alas!" "What happened, dear?" "Father kicked the goal."

Radio listeners in Chile are demanding better programs.

Heritage Worth Cherishing

Language Of Canada Is One Of Her Finest Possessions

This is a plea for the protection of one of Canada's finest possessions—her language. In the English language, modern Canadians have inherited a great medium of expression, comprehensive, flexible, powerful, beautiful. It is capable of expressing the finest shades of meaning every mood and emotion. And yet, like a plenary strutting peacock on two or three keys with a whole keyboard at his disposal, there are people whose perennial reply to almost every remark is "O yeah!" or "I'll say!" We do not advocate pedantic speech and we recognize some slang terms as most apt, but the constant reiteration of even the most expressive and their application on every occasion is sheer mental laziness.

The careless misuse of simple words is also a common offence. Probably one of the most frequent errors of this kind is the misuse of the word "good" for "well". The individual who remarks that he is not "feeling so good to-day" and who thinks he is talking about his health, would be startled if his hearer took his words at their correct meaning and perhaps advised him to see his minister about his "badness". It is difficult to know just what causes such errors. Perhaps it is custom; some of them are extraordinarily common. Perhaps it is lack of thought. It is plain to everyone that "don't" is a contraction for "do not" and while practically no English-speaking Canadian would be guilty of saying "he do not", yet "he don't" is heard not infrequently.

Lack of imagination, lack of thought and just carelessness all have a part in the abuse of one of Canada's finest possessions. Legal minds protect the beauty of Canadian parks and protect her magnificent natural resources, but it rests with the individual to guard the beauty of her language.—St. Thomas Times-Journal.

Names Go In Cycles

Certain Ones Have Run Especially Those For Girls

The list of Christian names compiled from English public school records shows a rather surprising fact: the name John is a very easy winner in popularity. Seventy years ago John was only fifth on the list, but now his total nearly doubles that of his runner-up, Peter. Thirty years ago Peter did not appear in the list of more prominent names at all. This, of course, was before Sir James Barrie lifted him out of obscurity. With him came Michael, who now vies with Anthony, well up in the lists but a long way behind John.

Girls' names, in particular, seem to come in cycles so that in time it begins to be possible to guess to within a year or two the ages of their owners. At one school there is a junior certificate class to-day in which one of 13 children are called Joan. A year or two later came Rosemary, Pamela and Penelope, followed in close succession by an innumerable host of little girls called Kathleen. And now, just emerging from perambulators to walk unsteadily down the garden path, come Jennifer and Lillian. So the cycles go until we are back again with the Sallies and Marys that our mothers shrunk from, but which our daughters fall on with glee.

Strength Of Wool

Will Stand Lots Of Stretching Without Being Broken

There are over 200 kinds of knitting wools, ranging from stout yarns for men's jumpers and swimming suits to the delicate Angora in which a baby is wrapped. The finest wool is clipped from a healthy sheep at the appropriate season of the year; clips from the skin of a dead animal are inferior. The art of blending wools to produce a fine knitting yarn for a particular purpose takes years of experience, just as the dyeing is the outcome of the very latest research in the chemical laboratory. Wool fibre weighs less than any other textile fibre of the same dimensions, so that wool is light to wear. It is remarkably elastic, for a fibre can be stretched to over 30 per cent of its original length without breaking, and will immediately return to its former length when released. A woollen garment is so strong because the single hair has the same tensile capacity as a golden wire of the same diameter.

In search of a metal lighter than aluminium, scientists are experimenting with magnesium sulphate, or spinels.

An egotist is a man who always talks about himself when you want to talk about yourself.

Good Roads To National Parks

Program Of Highway Improvement In Alberta

Three of Canada's greatest national parks, with an area exceeding 7,000 square miles, lie along the eastern slopes of the Rocky Mountains in the province of Alberta. Every effort is being made to maintain these parks in the beauty with which nature endowed them, but, of course, roads are essential, and splendid highways have been built, both in the parks themselves and to connect with the provincial highway system, which, in turn, connects with all the continent.

An extensive program of highway improvement, and further improvements in the mountain national parks of Alberta, have been recently announced. Highway improvement and construction plans include the completion of the motor highway from Edmonton to Jasper National Park as an all-weather route, the reconstruction of the portion of the Calgary-Banff Highway west from Cochrane into the park, which will put this highway in excellent condition for motor traffic, and further construction on the new mountain highway connecting Jasper National Park with Banff Park at Lake Louise.

Plans within the national parks include further highway construction in both Banff and Jasper Parks, an airplane landing field in Banff Park, and general improvement of facilities in these parks, as well as improvement of facilities of Elk Island Park east of Edmonton, and at Waterton Lakes Park in the southern part of the Alberta Rockies, including \$70,000 to be spent towards the completion of the new international highway connecting Waterton Lakes Park with Glacier Park in Montana. A good part of the magnificent highway through the mountains from Banff to Jasper is now completed from both ends, and the entire road is expected to be finished in the next two seasons.

No less than 43,972 automobiles passed through the gates of Banff National Park between April 1 and August 31 of the present year, an increase of 2,750 over the same period in 1933.

Something Worth Knowing

Cool Dry Weather Is Best For An Operation

To have your appendix out with the greatest safety, pick a dry period for the operation, and not too hot.

Weather forecasting for health was described to the members of the Royal Association of Physicians, Dr. Clarence A. Mills, professor for experimental medicine, University of Cincinnati.

Peaks of several of the leading causes of death in the United States were traced to weather. Dr. Mills predicts that hospitals will use air conditioning to produce artificial climates to combat disease.

"Moist heat," he said, "that depresses bodily metabolism makes for an increased susceptibility to infection and lessened ability to fight bacterial invasions, once they have gained a foothold."

"I have found definite differences in this respect between the more active people of the north and the more sedentary people of the south. Of each 100 cases of acute appendicitis handled in hospitals, the fatality rate is almost three times as high in the south, with a steady lowering of the fatality rate as one goes northward from the gulf region."

"Hospitals properly constructed would find little difficulty in providing any type of artificial climate a physician might desire for particular purposes. Portable equipment could be moved from room to room for heating, cooling, adding moisture or drying the air."

Life's Darkest Moment

The Wall Street Journal relates the case of the old gentleman who was telling about the experiences of his youth.

"Yes," he said, "I have had some terrible disappointments, but none stands out over the years like one that came to me when I was a boy."

"And what was it?" asked a listener.

"When I was a boy I crawled under a tent to see the circus, and I discovered it was a revival meeting."

Another Stratosphere Flight

Prof. Auguste Piccard said in Lausanne, Switzerland, that he planned to attempt a 100,000-foot balloon ascension into the stratosphere next year. He said he was working on the technical aspect of such a feat and was preparing plans for a balloon capable of rising to a height almost double that of his 1932 achievement, when he and Max Cosyns reached 53,000 feet.

The Crossfield Chronicle

ESTABLISHED 1907

THURSDAY, Oct 18, 1934.

Local News

W. Spivey's new residence on
Ross Street is nearing completion.
Jim Belshaw was a business visitor
in Calgary on Monday.

Mrs. N. A. Johnson spent the
first of the week in Calgary.

Mrs. C. L. McCool left on Friday
to visit relatives at Youngstown.

Mr. and Mrs. Paul Swanson of
Bottrel were the guests of Mr. and
Mrs. R. M. McCool on Monday.

J. P. Metherall left on Monday
for Foremost, Alta. to look after
his interests in that district.

Keep in mind the Whist Drive
in the U. F. A. hall on Monday
night. Good prizes.

Mr. and Mrs. P. L. Johnstone
were visitors at Turner Valley on
Sunday afternoon.

R. T. Amery arrived home on
Saturday evening after spending
the summer in Walla Walla, Wash.

Colonel McGregor, school in-
spector of Calgary was a visitor in
town on Tuesday.

Eric Landymore purchased a
Cockshutt tractor and plows from
the local agent W. A. Hurt on
Tuesday.

Mrs. A. Cruickshank, Miss Flor-
ence Cruickshank, Miss Grace Wil-
liams and Mrs. W. Miller were
Calgary visitors on Saturday.

Take advantage of the 10 per
cent reduction on current Village
taxes by paying your taxes this
month.

Mrs. F. Mossop returned home
on Saturday from Okotoks where
she has been visiting her daughter
for the past week.

The U. F. A. of Airdrie are hold-
ing a chicken supper in the United
church on Friday evening of this
week from 6.00 to 8.00 o'clock.

It has been arranged to have Al-
fred Speakman, M. P. address a
public meeting in Crossfield in the
very near future.

Registration of Dominion voters
commences October 15th. If you
are a qualified elector, be sure
you get your name on the new
voters' list.

W. D. McCool the first child
born in Crossfield, celebrated his
32nd birthday on Sunday. "Jim"
put in the day threshing and was
reasonably sober.

The old wooden sidewalk that
was taken up on Strathcona Ave.
is being put down from Dan Fike's
corner north as far as the material
will go.

Elephant Brand Fertilizer appears
to have made a hit with the farm-
ers of this district as W. A. Hurt
has already disposed of two car-
loads for spring delivery.

Constable Cameron is building a
hen house at the rear of his home.
We understand he is going to raise
pheasants and has already acquired
a pen of these beautiful birds.

Now is the time to get your
name on the voters' list of the Vil-
lage of Crossfield. Tenants and re-
latives of persons on the assessment
roll must register before the last
day of November in each year.

Shirley, youngest daughter of
Mr. and Mrs. Miles Fike who has
been ill with chicken pox has fully
recovered and it is expected that
the quarantine will be lifted today
(Thursday).

Luke Wallace proprietor of the
Crossfield Laundry, was the winner
of \$50 in the Alberta Legion Sweep-
stake. Luke received the money
last week and has been treating his
friends and generally putting the
money in circulation.

Mr. and Mrs. A. D. Currie were
the recipients of invitations to wit-
ness the Innisfail Players in "So
this is London" Thursday night at
Innisfail, and they intend going
next accompanied by G. Y. Mc-
Lean.

Everett Bills, Bob Smart and
Archie Anderson were among those
from Crossfield who attended the
baseball game at Calgary on Sat-
urday, when the touring American
League all stars played a Calgary
team of professional hockey play-
ers, but very amateur ball players.

Coming Auction Sale

Wednesday, October 31—R. D.
Sutherland's sale of stock, machin-
ery, etc. 3 miles east and 1 mile
south of Carstairs. Archie Boyon,
auctioneer.

New Tar Sand Sidewalks

The new tar sands sidewalk on
Strathcona Avenue from the Mas-
onic hall to Dan Fike's corner is
being put down this week.

The sidewalk on Alberta Avenue
which now terminates at Mr. Sef-
ton's residence will be continued
on down to Springsteen's corner.
Tar sands will also be used for this
extension.

The Council is putting down
these two walks this fall with a
view to testing out tar sands, and
should it prove satisfactory, it is
their intention to replace them to
time, all the wooden sidewalks
with this product.

Hughie Has "Water Witches"

For Town Well
Hughie McIntyre has not got
started on the new well for the
skating rink, although he has com-
pleted preliminary arrangements by
having Culver Calhoun and A. L.
Frisk locate the spot by witching.
We would suggest that he send to
Calgary for Jim Ruddy. Mr. Ruddy
has a reputation for doing his stuff
with a willow, in fact he has locat-
ed many wells in this district.

Not a Chance Now

We are informed that our friend
Archie McFadyen has bought a
cat. We did not think Archie
could stand the gall without doing
something foolish, as he harvested
one of the best crops in the dis-
trict, and just had to have action
on that surplus money. And here
we were all set to make a touch.

Sailor Goodland Gets Decision

Adam Cruickshank, Ivor Lewis
and Archie McFadyen took in the
Goodland-Tracy fight at Calgary
on Friday night. Goodland won
the decision. It was a real old time
slugging match and by long odds
the best fight held in Calgary in
many years. Archie Boyce of Car-
stairs was the promoter.

Band Concert in Near Future

The Carstairs-Crossfield Com-
munity Band intend giving a con-
cert in the Crossfield park in the
near future.

The band have been practising
once or twice a week and will ap-
pear with a complete new program,
featuring some of the latest marches
and other standard selections.

Madden Notes

Mr. and Mrs. Tom Tidball and
family were the guests of Mr. and
Mrs. R. D. Sutherland of Crossfield,
on Sunday.

The many friends of George Mc-
Intosh will be glad to know that
he is progressing favorably follow-
ing a recent paralytic stroke.

"Abe and Deb" the big shots of
Madden, took in the dance at Cross-
field on Saturday night.

Mr. and Mrs. H. J. Stone and
Mr. and Mrs. Wm. Kipl and family
left on Friday last on an extended
auto trip to Washington, Oregon,
and California.

Tom Tidball has a car of salt
and a carload of Midland coal on
track. Now is the time to buy and
save money.

Henry Poffenroth has threshed a
big crop this year, getting around
7,000 of wheat for an average of
40 bushels.

Rain on Saturday and snow the
first of the week will delay thresh-
ing in this district for some time.
Three or four days will clean up
the remaining threshing.

If you no longer use it, sell it—
through a "For Sale" ad.

machinery.

We recommend MOBIL OIL
Service That Satisfies.

**Threshing About Over**

Threshing was resumed here
again today (Thursday) after being
held up since Monday owing to
rain and a light fall of snow. Many
rigs have finished and pulled in,
while others have from one to five
days threshing to do.

Where well average around 18
bushels for the district. Oats from
25 to 30 bushels, with the majority
of fields west of town running
over 50. Barley is rather a poor
crop for this district but yields of
25 bushels and better are reported.

Many from Outside Points

at Baptist Rally
The Fall Rally of the Regular
Baptist Church of Alberta held
here last week was attended by
delegates from Calgary, Edmonton,
Drumheller, Banalto and Leslie-
ville.

Meals for visitors and guests
were served at the Masonic Hall,
and there was an abundance of
food for everyone.

Messages were delivered at three
services each on Wednesday and
Thursday, and all went home feel-
ing better and having obtained
much spiritual blessing.

Jim Belshaw Wants A Little

More Than Sympathy
Mr. Belshaw's efforts to effect an
amicable settlement between him-
self and Mr. Rogers of Calgary,
(with regard to the accident during
the month of July) have failed, Jim
has had no other recourse than to
place his case in the hands of his
solicitor and start proceedings.

The public will recall that in
July last Mr. Belshaw was involv-
ed in an accident on the highway
near Olds, while assisting Mr. Pat-
more to change tires, and as a re-
sult of being run into, lost the use
of three fingers. Claiming some
compensation from the owner of
the car which caused him bodily
harm, Jim, has been unable to get
satisfaction, and last Monday in-
terviewed his solicitor Mr. W. E.
Hall with a view to having him
take steps to effect settlement,
either peaceably, or with the aid of
the courts.

Reesor D. James of Carstairs ob-
tained a decree of divorce absolute
from his wife, Grace James. Cust-
ody of one child was given the
husband, and custody of the other
child to the wife.—Calgary Herald,
October 15th.

OBITUARY

MRS. R. FOSTER
Last rites for the late Mrs. Lilli
an I. Foster, wife of Robert Foster,
of Carstairs, who died in a Calgary
hospital Friday, aged 29 years,
were held Sunday afternoon at St.
Agnes' Church, Carstairs. Interment
was made in Carstairs cemetery.
